-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

1. The abstract of the disclosure is objected to because it does not describe the invention now being claimed. Correction is required. See MPEP § 608.01(b).
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 9, and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by CRAIG et al (4,003,265).

Note figures 2 and 3, and specification column 5 lines 53-61. CRAIG et al discloses that a spindle assembly is balanced using a plurality of adjustable eccentric rings (36,38,60,62). Known dynamic balancing mechanisms and methods are used to achieve the balanced condition.

4. Claims 3-8, 10, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or suggest a method of balancing a spindle assembly including providing a spindle having a plurality of adjustable eccentric rings, measuring the imbalance of the assembly, and adjusting the balance by rotating the spindle while engaging at least one of the eccentric rings to position it at the position necessary to eliminate imbalance.
